Disclaimer

U.S. Government Required Disclaimer - Commodity Futures Trading Commission Futures and Options trading has large potential rewards, but also large potential risk. You must be aware of the risks and be willing to accept them in order to invest in the futures and options markets. Don't trade with money you can't afford to lose. This is neither a solicitation nor an offer to Buy/Sell futures or options. No representation is being made that any account will or is likely to achieve profits or losses similar to those discussed on this web site. The past performance of any trading system or methodology is not necessarily indicative of future results.

CFTC RULE 4.41 - HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS. UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL TRADING. ALSO, SINCE THE TRADES HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN.

No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. Hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading.

Be warned that there is a possibility to lose real money if traded on a real money account, and the owners of Forex Hacked can NOT be held accountable for any losses that may occur.

You accept full responsibilities for your actions, trades, profit or loss, and agree to hold Fellow Traders and any authorized distributors of this information harmless in any and all ways.

Forex Hacked and Forex Hacked Pro can run the risk of hitting a margin call. It’s highly important that you understand and accept this fact before trading with real money and only risk what you can afford to lose. You should only expect realistic gains if you want to be as safe as possible. Trying to double your equity every month is possible but runs a very high risk of seeing a margin call if things go badly. Aim for 5-10% per month to be very safe, 10-20% to be moderately safe and anything higher gets riskier and riskier!

Forex Hacked 2.5 & Pro Account & Broker Guide

Account Size Recommendations

You generally want about $10,000 Equity per currency pair where 0.1 lots = $1.00 at 1:500 leverage. So that would be like our $2000 micro cent ecn/stp account at fxopen where its $200,000 cents which gives enough room for 9 charts to run. This setup is usually good for about 0.25% gain per day. You can deviate from this setup either way if you want a higher daily gain with more risk, or a lower daily gain for an even safer setup.

We always recommend starting at as low a risk as possible and slowly increasing it week to week until you get a comfortable setup for your own personal preference.

$1-$1000: InstaForex, XE Markets, Trade Fort and Profi Forex are options for this account size.

$1,000-Unlimited: **FxOpen**, InstaForex, Lite Forex and IBFX AU are all supported brokers offering nano lots and high leverage.

$10,00+: Brokers that allow micro lots, hedging and leverage of 1:300 or higher. FX Primus, Synergyfx are a few.

$50,00+: Any brokers that allow micro lots, at least 1:200 leverage and must allow hedging!

US Residents- For smaller accounts try Trade Fort or Profi Forex. If you're trading $10,000+ go with FinFx.fi

FxOpen

We recommend use **FxOpen** for our live micro ECN/STP cent accounts. We generally use $1500 - $2000 trading 0.1 lots with 1:500 leverage. Trading 9 pairs this is generally good for about 0.25% per day which would be a conservative setup. At $3000 it automatically converts to a standard account so we always withdraw $900 when it gets to $2900 and rinse and repeat.

InstaForex

InstaForex is another flexible broker to trade Forex Hacked on because it offers both pico and nano lots with min deposits of just $1 and leverage up to 1:1000. However, notice the 30% margin call! That means if your account ever hits 30% of your equity in floating trades, it's considered a margin call and you just lost 30% of your account as all trades are automatically closed.

This can be both good and bad. Good if you don't ever want to risk more than 30% of your account. Bad if you plan on running riskier settings where a 30% drawdown can be common. I'd recommend only low risk settings here aiming for 0.10% a day. You could achieve that by going with a cent account at 1:1000 leverage and trading 0.1 lots and 5-6 charts.

Account types:

Options	Account type
